Regression Models Course Project

Synopsis

The Project work for Motor Trend, a magazine about the automobile industry. Looking at a data set of a collection of cars, they are interested in exploring the relationship between a set of variables and miles per gallon (MPG).They are particularly interested in the following two questions:

"Is an automatic or manual transmission better for MPG" "Quantifying how different is the MPG between automatic and manual transmissions?"

Data Loading

Load the data

```
data(mtcars)
```

Exploratory analysis

```
summary(mtcars)
```

```

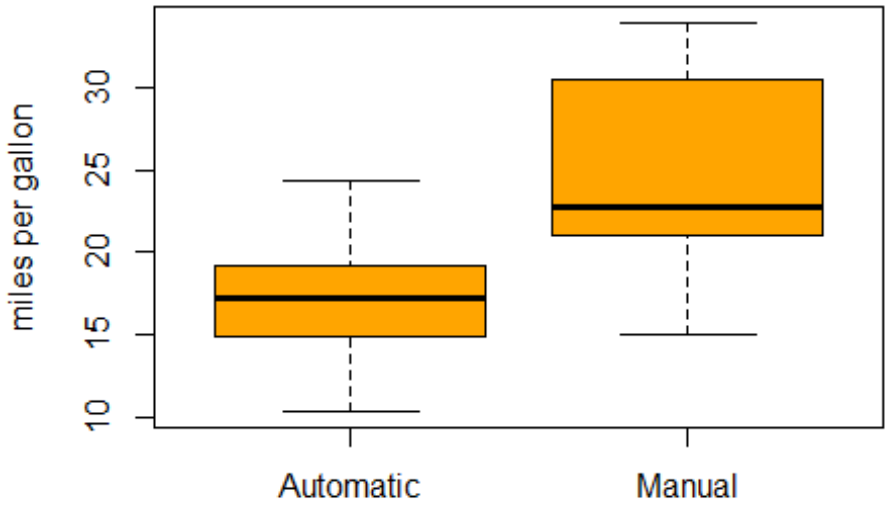
## Residual standard error: 2.41 on 26 degrees of freedom
## Multiple R-squared:  0.8659, Adjusted R-squared:  0.8401
## F-statistic: 33.57 on 5 and 26 DF,  p-value: 1.506e-10
```

```r
t.test(mpg ~ am, data = mtcars)
```

```
##
##  Welch Two Sample t-test
##
## data:  mpg by am
## t = -3.7671, df = 18.332, p-value = 0.001374
## alternative hypothesis: true difference in means is not equal to 0
```

```
## 95 percent confidence interval:
##  -11.280194  -3.209684
## sample estimates:
## mean in group Automatic    mean in group Manual
##                17.14737                24.39231
```

```r
boxplot(mpg ~ am, data = mtcars, col = "orange", ylab = "miles per gallon")
```



The boxplots show a difference in mpg depending on the type of transmission. The t-test output confirms that this difference is statistically significant (p-value < 0.05)

Appendix
